Update to the Notification Tabs

In order to provide law firms with an efficient way to manage their inventory of electronic notifications, a new **'Choose Trust'** filter has been added. By selecting a Trust from the Trust drop-down, users now have the option of viewing only specific Trust notifications.

This new drop-down includes all of the Trust(s) in which the user has access. Users may no longer view all of their Trust notifications at once and must select a Trust from the drop-down or leave the default and then click the **<Search>** button.
